# Alkacon Software – The OpenCms Experts

OpenCms means open source software with professional support, without compromise when it comes to quality and availability of training courses or development services. When it comes to OpenCms projects, Alkacon Software constantly delivers solutions to the most demanding customers on time and on budget.

## OpenCms Services from Alkacon Software

### Alkacon OpenCms Consulting and Development

We are offering the individual OpenCms Consulting and development services best suited to our customers' requirements, from daily workshops up to large scale full project deliveries.

### Professional OpenCms Support from Alkacon

Are you considering development with OpenCms using your internal resources? Our professional support options provide a convenient way to access the knowledge and experience of the team from Alkacon that is responsible for the OpenCms core development.

### Alkacon OpenCms Training Courses

The OpenCms training courses of Alkacon Software provide the best possible introduction to OpenCms development, directly from the creators of OpenCms. We are offering several courses with different focus areas, from a beginner course up to the internals of the OpenCms API.

- OpenCms Complete Training (5 days)
- OpenCms Basics Template Training (3 days)
- OpenCms Advanced API Training (3 days)
- Individual Workshops (by arrangement)

Our training courses are available "on-site" at a location provided by our customer. We are used to travel worldwide.

#### NEW!

Alkacon now offers open training courses in a conference centre in Cologne, Germany – Please ask us for the next available schedule!

Further information about the OpenCms services and products from Alkacon Software including prices is available at:

## OpenCms Extensions from Alkacon Software

The extension modules from Alkacon Software provide additional functionalities not available in the OpenCms core distribution.

### **Alkacon OpenCms Enterprise Extensions (OCEE)**

The Alkacon OpenCms Enterprise Extensions (also called OCEE) are a commercial extension for OpenCms. Alkacon OCEE adds features to OpenCms that are often required for running OpenCms in a medium or large Enterprise, where data consistency, security and failover are highly important. This includes connecting to user directories like LDAP or Microsoft Active Directory, Cluster support, optimized caching and replication of the OpenCms database.

### **Alkacon OpenCms Add-On Module Package (OAMP)**

The Alkacon OpenCms Add-On Module Package (also called OAMP) is a set of free, open source extension modules for OpenCms. Alkacon OAMP adds front-end related features to OpenCms that may be useful in case special functionalities are required. The Alkacon OAMP modules are available free of charge as open source from Alkacon Software.

Currently available: Form generator, RSS feed creator, Newsletter, Counter, User registration – more are in development.
